**Franciszek G. Wrona** 

Various Definitions of a Planet

*Acta Phys. Pol. B Proc. Suppl.* **18**, 3-A2 (2025)

The part of the text in the first paragraph on page 4 should read:

Yet, is the IAU requirement necessary? Unlike in more recent proposals (*e.g.* [10]), according to the IAU's definition [3] if Earth was due to some gravitational perturbations moved into the asteroid belt, it would cease to be a planet until it ejected smaller bodies.
